## Login Process:-

In this process, **REGISTRATION Clerk/Operator** has to enter the User ID & Password in the respective login screen. As shown below:

**Step 1:-** Enter 'user Id' and 'Password' then click on 'Login' button after successful login, menu screen will appear.

### Login Form

## Errors and exceptions in Login

Your Login may fail due to any of the following:

- Incorrect User Id or password
- User login expired
- Network / Server failure

In all cases of errors, the system will display relevant error message.

## Incorrect Login name or password

The system will display **Login Failed** message: -

**Figure I**

This error could occur because the user has entered the User Id /or password incorrectly.

## User Login Expired

In the user management module, corresponding to every new user created, the expiry date for that user ID is stored. Upon reaching the expiry date, the user would not be able to login successfully.

## Network / Server failure

In the case where your system is unable to establish a network connection with the designated server the system will display a message. Please contact the administrator for further

instructions.

### **Forgot Password: -**

All the Users of Hospital Management Information system (HMIS) have been allotted user name and Password. User name is a name, which will enable the user to log on to the HMIS. The password is like a digital signature. It is very imperative that one should keep one's password a secret. Disclosing your password is like telling the secret code of a number lock to someone. Whenever a user saves a crucial record into the database, his user name is also attached to the record. At any given point later the System administrator can find out who saved the record into the database. So if someone knows your Password he will log on to the system using it and add anything into the database and you could be held responsible for it later. Never disclose your Password to anyone and do not keep your name, family member's names or anything that can be guessed by people around you as Password

Note: - If forgot your password then follow following steps: -

Step 1: - Click on 'Forgot Password'

**Figure II**

Step 2: - Select hint question from list box and answer the hint question or click on change password by Mobile & OTP

Step 3: - Click on 'Next' button.

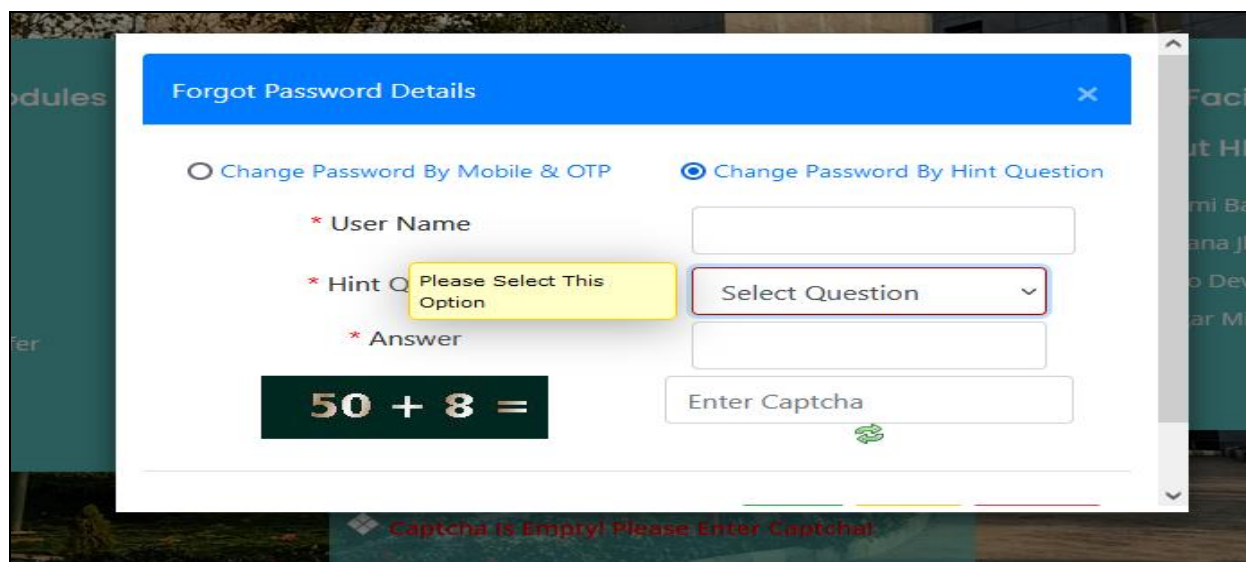

Figure III

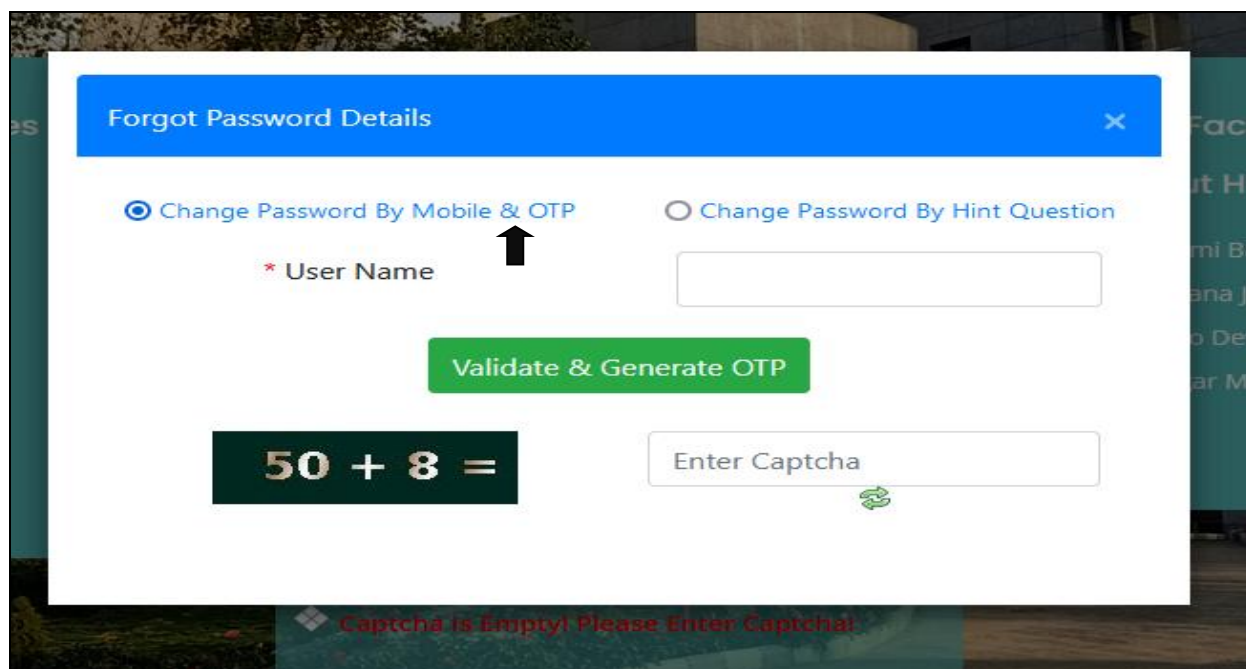

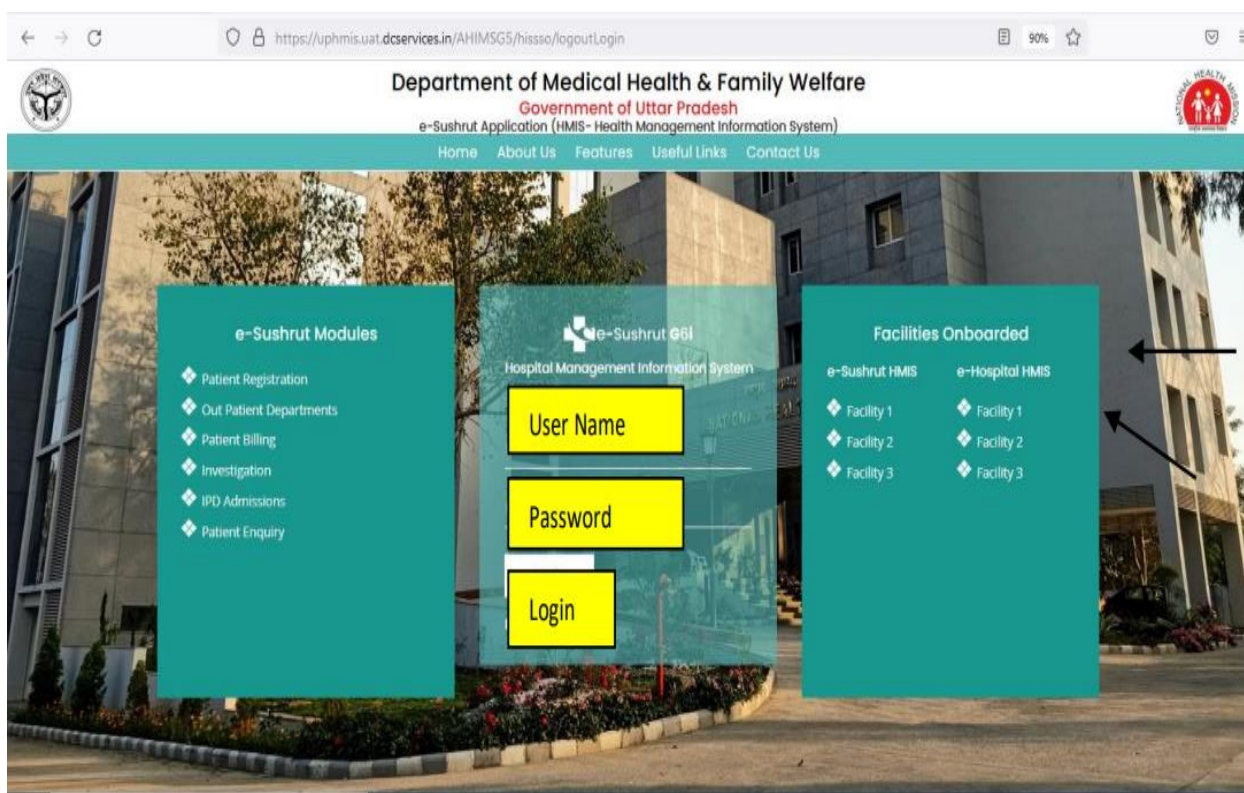

Figure IV

Step 4: - Enter new password and re enter password in confirm password field, then click on 'Save' to save the password.

After that you will get a message 'Your password has been changed'

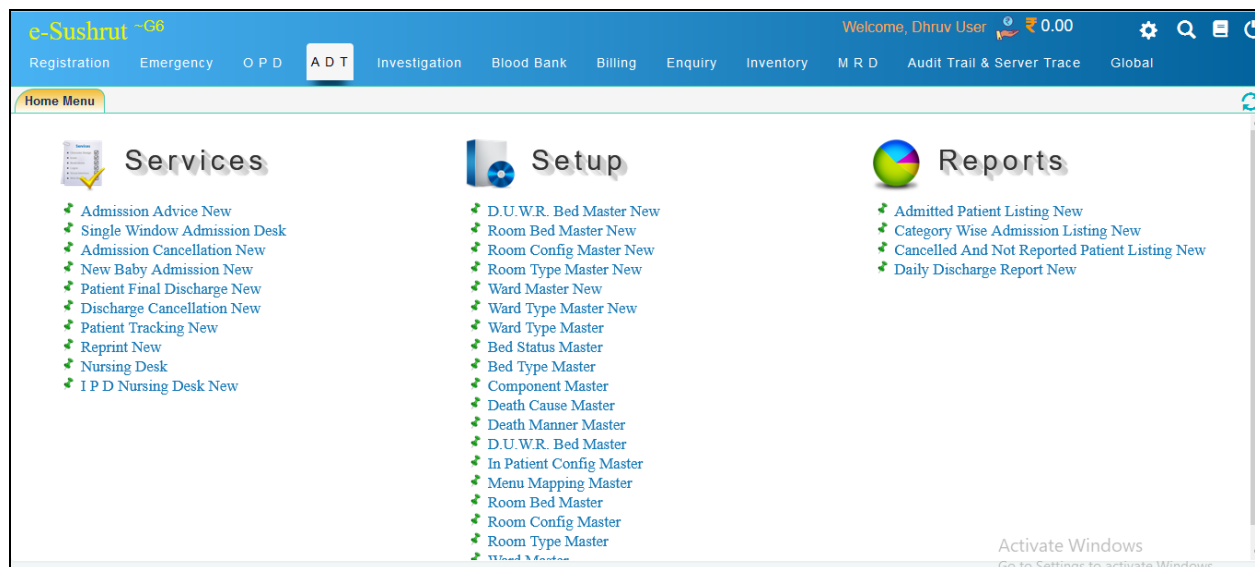

Login Form: -

Step 1: - Enter 'User Id', 'Password' and Captcha and then click on 'Login' button.

**Figure V**

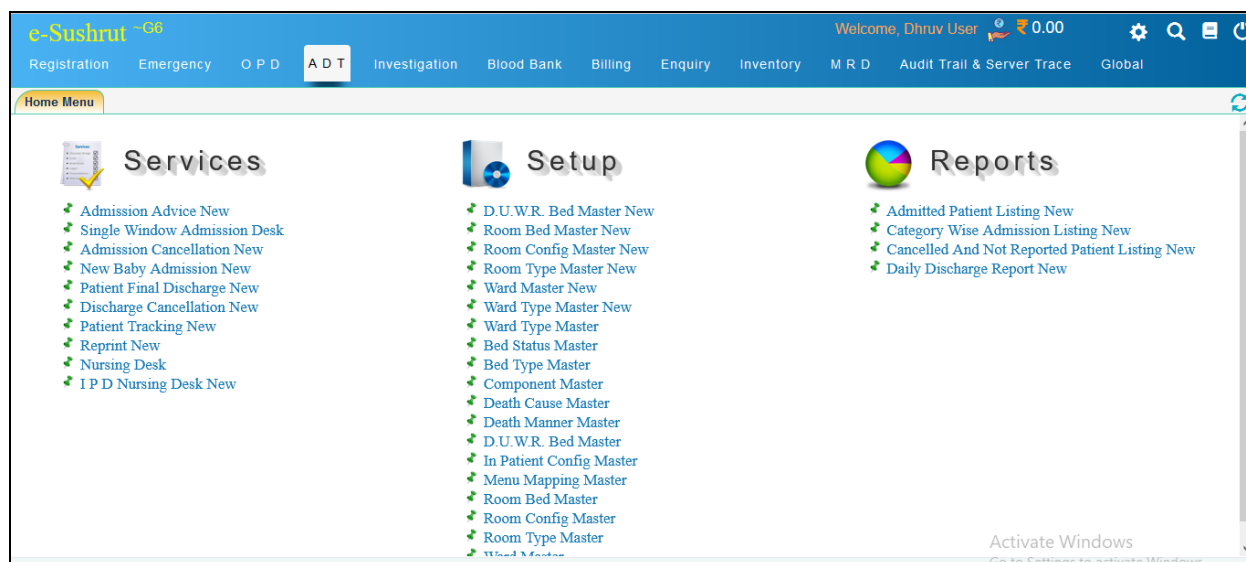

## HIS Services

**Figure VI**

After successful login menu screen appear, you can select required service.

Click on 'ADT' to expand it and to view all the menus in 'ADT' view Figure below

**Figure VII**

ADT: -The term ADT means patient Admission, Discharge and Transfer. The patients come into this section for Admission in Hospital.

New Patient Admission can be done via Doctor Consultation from OPD and Emergency. The patient will be given a unique registration number called the central registration number (CRN) This number will be valid throughout the lifetime of the patient. This CR Number uniquely identifies a patient in HIMS.

The user will create admission advice for the Patient, thereafter patient has to pay the admission fee as per his category.

After showing the receipt of bill patient will be admitted in hospital for further treatment.

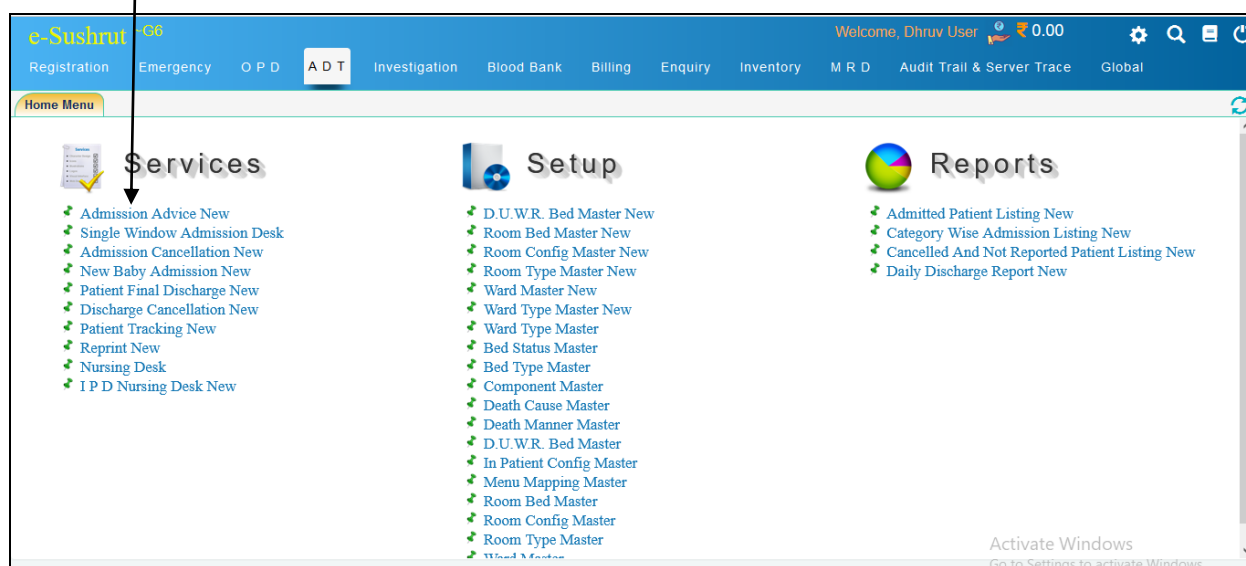

This module provides the complete information about Patient Admission, Transfer and Discharge from hospital, during treatment the nursing facility provided to him/her etc.

After treatment process at the time of discharge Patient has to finalize his dues against him/her.
